## Solid wood Floor

Solid wood flooring is a popular type of hardwood flooring made from one piece of hardwood timber such as American Oak Wood or Walnut Wood. This is also referred to as real wood flooring and available in various impressive Stains. In Modern Building Structures this wood flooring is very much popular and is recommended for domestic and commercial application, as it enhances the floor looks and appeal.

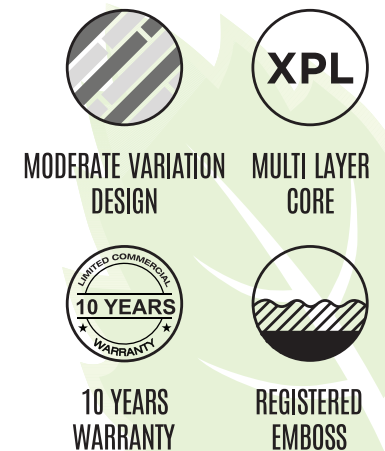

# ***Laminate Wood*** **Floors**

## Laminate Wood Floor

Laminate flooring is the innovative and price competitive flooring solution and made up of a multi-layer synthetic flooring product bonded together with a lamination process. Laminate flooring simulates wood with a photographic applique layer under a clear protective layer (HDF Core Board, Overlay, Decorative Paper and Backer). Our product is of a Superior Water-Resistant quality with minimum 10 years manufacturer warranty.
